EDUCATION

Lokmanya Tilak College of Engineering

B.E. – CSE (IoT & Cyber Security including Blockchain Technology)

Koparkhairane, Navi Mumbai

Expected 2027

Model College of Science and Commerce

Higher Secondary Education

Kalyan

2020 – 2022

EXPERIENCE

Technical Operations Management Intern

Eynexa Pharma

May 2026 – June 2026

Kalyan (Hybrid)

- Engineered the company's corporate website, overseeing the full lifecycle from requirements gathering, design, and development to deployment preparation.
- Spearheaded brand identity development, designing visual assets, logo systems, and guidelines to ensure consistent corporate messaging.
- Helped with technical setup, system functions, and documentation to support day-to-day digital operations.

Freelance Full-Stack Developer

Independent Client

Dec. 2025 – Present

Remote

- Made a major contribution to the development of a custom responsive e-commerce platform, translating business requirements into technical architecture and design blueprints.
- Built dynamic frontend components to streamline the user shopping experience, improve product discoverability, and gained experience creating and maintaining project documentation.

Administrative Assistant (Part-Time)

Excellent Tutorials

Dec. 2024 – Apr. 2025

Kalyan

- Managed daily operations including attendance, scheduling, and student records with strict accuracy and minimal oversight.
- Coordinated examination logistics ensuring adherence to tight operational timelines.

PROJECTS

Careflow: AI-Based Receptionist System | [Link](#) | Next.js, React, Groq API, Supabase, Tailwind CSS

- Engineered a Next.js application using Supabase for secure data management and user authentication.
- Integrated the Groq API to process language model queries, delivering context-aware AI responses with sub-second latency.
- Implemented responsive and animated user interfaces using Tailwind CSS and Framer Motion.

Codebot: Open-Source ChatGPT Alternative | [Link](#) | React, TypeScript, Groq API, Vite, Tailwind CSS

- Developed a conversational AI interface using React and Vite.
- Integrated the Groq SDK for language model inference with real-time streaming and sub-second latency.
- Configured LocalForage for chat persistence and React Markdown for syntax-highlighted text rendering.

NFTicketing: Decentralized Event Ticketing Platform | [Link](#) | Solidity, React, Ethers.js, Sepolia

- Developed a decentralized application (dApp) using React and Vite to facilitate NFT-based event ticketing.
- Designed ERC721 smart contracts to issue tamper-proof tokens, ensuring verifiable ownership and eliminating fraud.
- Integrated Ethers.js to securely connect the frontend with Ethereum and enable MetaMask transactions.

LEADERSHIP

Design Head

Model Business Summit & Zephyr 2026

College Events

- Directed visual branding and social media campaigns for two large-scale inter-college events, leading design teams to produce high-conversion marketing assets.

SKILLS

Technical: HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, Node.js, React.js, Next.js, Solidity, Supabase, SQL, Responsive Design, SEO

Tools & APIs: Git, GitHub, REST APIs, Groq API, Vite, Ethers.js

Design: Brand Identity, Visual Design, Social Media Graphics, Canva

Operations: Workflow Optimization, Project Coordination, Process Documentation, MS Office Suite
