Education

Lokmanya Tilak College of Engineering — Koparkhairane, Navi Mumbai
B.E. – CSE (IoT & Cyber Security including Blockchain Technology) — *Expected 2027*

Model College of Science and Commerce — Kalyan
Higher Secondary Education — *2020 – 2022*

Experience

Technical and Digital Operations Intern — Aug. 2026 – Present
Purplotus Consultancy — *Remote*

- Engineered frontend modules for Scale Orbit, an AI-assisted People Systems platform that automates organizational workflows and HR diagnostic toolkits.
- Built a config-driven schema engine to dynamically generate 18+ business tools without hardcoded templates.
- Implemented modular configuration packages across diagnostic, psychometric, and HR tools within a pnpm monorepo.

Technical Operations Lead (Part-Time) — Nov. 2025 – Present
Phasecor Healthcare — *Kalyan (Hybrid)*

- Develop and maintain corporate and e-commerce platforms on Vercel using Next.js, sustaining 99.99% uptime and under 1.5s load times.
- Automate e-commerce workflows and product enquiry pipelines, reducing manual processing by 70%.
- Manage daily technical operations, domain DNS, corporate email infrastructure, and e-commerce operations.

Freelance Developer — Oct. 2025 – Present
Freelance | ***Link*** — *Remote*

- Engineer responsive corporate websites and web applications tailored to diverse client specifications.
- Develop modern full-stack web applications using Next.js and Tailwind CSS with modular architectures.

Projects

Sentinel: Autonomous Cybersecurity Platform | **Link** | **Source** | *Next.js, Nuclei, Katana, Supabase*

- Architected an autonomous security platform with a 5-stage agent state machine, mapping 100% of discoverable target endpoints to triage vulnerabilities.
- Integrated Katana, Nuclei, and 800+ TruffleHog rules to detect secrets and eliminate false alerts.
- Built an AST-based auto-patcher with 2 self-healing sandbox compile loops to dispatch verified GitHub PRs.

Dropline: P2P File Sharing Platform | **Link** | **Source** | *Next.js, WebRTC, Supabase, TypeScript*

- Engineered a serverless P2P file sharing platform using WebRTC DataChannels with zero cloud storage.
- Implemented 64KB chunked binary streaming with a 1MB buffer threshold for backpressure flow control, ensuring stable large-file transfers.
- Used Supabase real-time channels for SDP/ICE signaling and instant 6-character room code pairing.

Careflow: AI-Based Receptionist System | **Link** | **Source** | *Next.js, Groq API, Supabase, Tailwind CSS*

- Built an AI medical receptionist with Next.js and Supabase RLS, ensuring 100% patient data isolation.
- Integrated Groq Llama 3.1 API to process conversational patient intake and clinical triage, streaming AI responses with sub-400ms latency.
- Designed 15+ interactive UI components with Tailwind CSS for streamlined appointment booking.

Leadership

Design Head — College Events
Model Business Summit & Zephyr 2026

- Led a team of 8 designers to produce 50+ branded visual assets across 2 flagship events, engaging 1,500+ attendees.

Skills

Technical: HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, Node.js, React.js, Next.js, Solid.js, WebRTC, Supabase, SQL, SEO
Tools & APIs: Git, GitHub, Docker, Redis, REST APIs, Groq API, Vite
Design: Brand Identity, Visual Design, Social Media Graphics, Canva
Operations: Workflow Optimization, Project Coordination, Process Documentation, MS Office Suite
