EDUCATION

Lokmanya Tilak College of Engineering

B.E. – CSE (IoT & Cyber Security including Blockchain Technology)

Koparkhairane, Navi Mumbai

Expected 2027

Model College of Science and Commerce

Higher Secondary Education

Kalyan

2020 – 2022

EXPERIENCE

Technical and Digital Operations Intern

Purplotus Consultancy

Ongoing

Remote

- Engineered full-stack features for Scale Orbit, an AI-assisted People Systems platform.
- Implemented a config-driven tool engine to dynamically generate tools without hardcoded templates.
- Collaborated to build a highly scalable and robust end-to-end web architecture.

Freelance Web Developer

Eynexa Pharma | [Link](#)

May 2026 – July 2026

Remote

- Engineered the company's corporate website, overseeing the full lifecycle from requirements gathering, design, and development to deployment.
- Spearheaded brand identity development, designing visual assets, logo systems, and guidelines.
- Established streamlined deployment workflows to support day-to-day digital operations.

Freelance Full-Stack Developer

Independent Client

Dec. 2025 – Jan. 2026

Remote

- Developed a custom responsive web application with real-time features using Next.js and Firebase.
- Engineered highly responsive modular components using Next.js and Tailwind CSS.
- Integrated Firebase for seamless real-time database and secure user authentication.

PROJECTS

Sentinel: Autonomous Cybersecurity Platform | [Link](#) | [Source](#) | *Next.js, Nuclei, Katana, Supabase*

- Developed an autonomous threat hunting scanner mapping attack surfaces and triaging findings via agent state machines.
- Integrated Nuclei and Katana for vulnerability scanning and automated reconnaissance.
- Utilized background job processing and Supabase for secure data management and real-time reporting.

Careflow: AI-Based Receptionist System | [Link](#) | [Source](#) | *Next.js, Groq API, Supabase, Tailwind CSS*

- Engineered a Next.js application using Supabase for secure data management and user authentication.
- Integrated the Groq API to process language model queries, delivering context-aware AI responses with sub-second latency.
- Implemented responsive and animated user interfaces using Tailwind CSS and Framer Motion.

NFTicketing: Decentralized Event Ticketing Platform | [Link](#) | [Source](#) | *Solidity, React, Ethers.js, Sepolia*

- Developed a decentralized application (dApp) using React and Vite to facilitate NFT-based event ticketing.
- Designed ERC721 smart contracts to issue tamper-proof tokens, ensuring verifiable ownership and eliminating fraud.
- Integrated Ethers.js to securely connect the frontend with Ethereum and enable MetaMask transactions.

LEADERSHIP

Design Head

Model Business Summit & Zephyr 2026

College Events

- Directed visual branding and social media campaigns for two large-scale inter-college events, leading design teams to produce high-conversion marketing assets.

SKILLS

Technical: HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, Node.js, React.js, Next.js, Solidity, Supabase, SQL, Responsive Design, SEO

Tools & APIs: Git, GitHub, REST APIs, Groq API, Vite, Ethers.js

Design: Brand Identity, Visual Design, Social Media Graphics, Canva

Operations: Workflow Optimization, Project Coordination, Process Documentation, MS Office Suite
